

Аларма за врата с 2 дистанционни

Product introduction:

This is a new product which is produced by the import elements, it uses the sensor of reed switch and the technology of wireless remote control. The capability is steady, and convenience to use. It's a full-new product for protection and security. It's the ideal choice to guard against thefts in house, cars, and some other valuables' wealth safety, etc.

Using Method:

- Open the battery board, distinguish anode and cathode, put into the batteries of 6F22 (in order to prolong the life of the products, suggest to use alkaline batteries), and then cover the board.
- Turn the switch onto "ON", the remote control can be operated (the distance mustn't longer than 5mm in order to tie in the magnet stries), press "🔒", it sets up defense, press "🔓", it withdraws the defense. (Please look at the sketch map when you use it).
- When the switch disjoined (under the defense), it will send out 120 decibels warning sound, until it is stopped by using the remote control, or fold the magnet strips.
- When the volume becomes low obviously, please change the battery immediately. If you do not use it in a long time, please take off the battery.
